

Memo No. 2019-021
Date: 26-Jun-2019
Memo To: Clients
Re: Various

Vitamin C, Serum

Method change: From HPLC to LC-MS-MS

Specimen requirements: 2.0 mL serum (red-grey SST)

Specimen handling: Spin and remove serum ASAP. Protect from light. Freeze immediately and keep frozen. Do not allow to thaw. Thawed specimens are unsuitable for analysis.

B-2-Glycoprotein 1 Antibody, Serum

Specimen requirements: 1.0 mL serum – one tube only

Specimen handling: Spin and remove serum ASAP. Freeze immediately and keep frozen. Do not allow to thaw. Thawed specimens are unsuitable for analysis.

Copeptin & Osmolality, Serum/Plasma (LiHep)

Copeptin testing has largely replaced ADH or AVP testing. If you order ADH or AVP, ICL staff will call your lab to ask if you will accept Copeptin as a replacement. If you choose not to, your order will either be canceled, or you may be offered a very expensive AVP option from ARUP labs in the USA. We do not know how long this option will continue to be available, since labs have all been moving away from offering it.
